

Data Privacy Day, held every year on January 28th, is an international effort to educate consumers about their data privacy rights and encourage organizations to respect consumers' privacy, safeguard their data, and establish digital trust.

Keeper Security takes data privacy very seriously. Our patented zero-knowledge, multi-tier encryption model ensures that only our customers can access the passwords and other sensitive data they store in their Keeper digital vaults.

In an effort to help other organizations be good stewards of their customers' data, as well as inform consumers about their privacy rights and how they can help keep their data safe, we've developed the following helpful resources.

Why Is Consumer Data Privacy So Important to Your Organization?

As more of our lives shift online, consumers are growing increasingly concerned about how their data is being used, processed, and stored by the organizations they do business with. This infographic explains why being a good data steward is just good business.
