

Cybersecurity in the Remote Work Era KEY FINDINGS FOR U.K. BUSINESSES

The COVID-19 pandemic forced businesses across the U.K. to adopt remote work on a massive scale, rapidly and without notice. Here are key findings from a new survey from Keeper Security and The Ponemon Institute.

COVID-19 sent **LARGE NUMBERS OF U.K. EMPLOYEES TO WORK FROM HOME**

75%

in the U.K. say that over half of their employees are now working remotely

Cyberattacks on U.K. BUSINESSES HAVE **R**ISEN DRAMATICALLY

60%

increase in the number of cyberattacks in the U.K.

Most remote workers **HAVE ACCESS TO CRITICAL INFORMATION**

74%

of employees who work remotely have access to critical, sensitive and proprietary information

IT SECURITY BUDGETS ARE INADEQUATE

for managing post-pandemic risks

57%

of respondents say that their IT security budget is inadequate for managing and mitigating today's cybersecurity risks

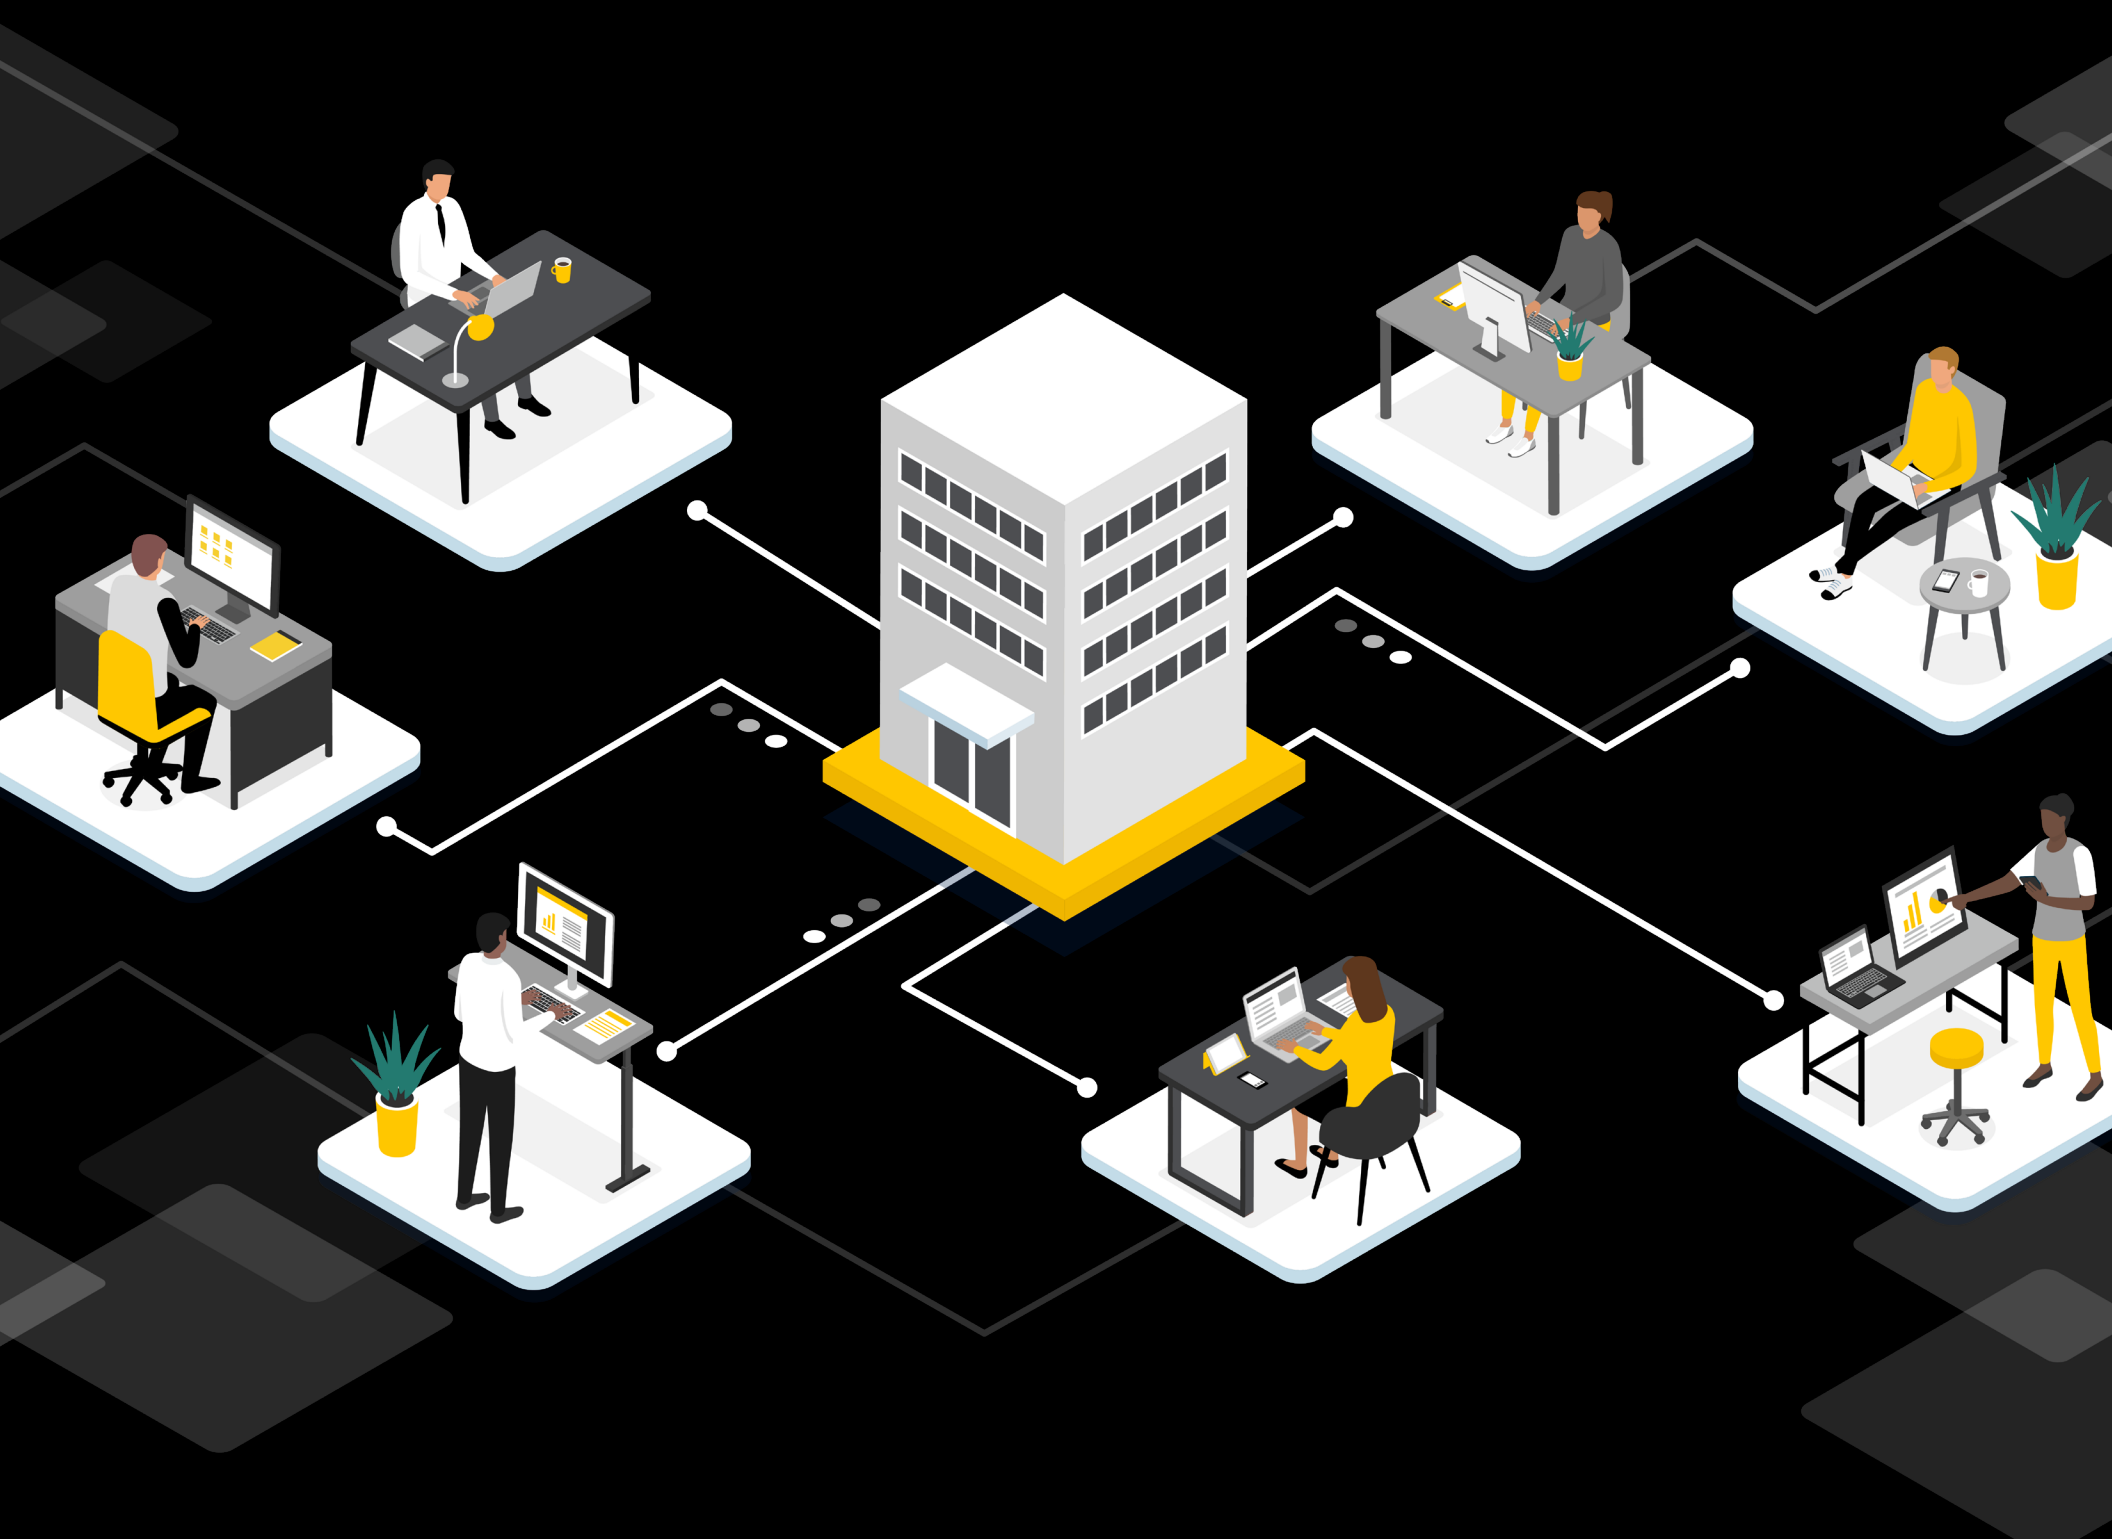

COVID-19 has made it **HARDER TO RESPOND TO CYBERATTACKS**

said COVID-19 has increased the time it takes to respond to a cyberattack

say that it has increased significantly
