

HOW TO ENHANCE CYBERSECURITY AS YOUR OFFICE REOPENS

Whether you're preparing to begin calling employees back on-site next week or next year, here are some tips to ensure a secure return to work.

1 ENSURE REMOTE WORKERS' DEVICES ARE BEING UPDATED

60%

of breaches result from failure to apply a security patch¹

2 REFRESH CYBERSECURITY TRAINING

43%

of employees lack cybersecurity training²

3 VALIDATE DEVICES AS EMPLOYEES RETURN ON-PREM

72%

of organizations are evaluating a Zero Trust model to ensure user, device, and infrastructure verification³

4 REEVALUATE CYBERSECURITY POLICIES

98%

of CISOs/CIOs are planning shifts in cyber strategy in response to the COVID-19 pandemic⁴

5 PLAN FOR A LONG-TERM REMOTE WORK STRATEGY

71%

of security professionals have reported increased security threats or attacks since the COVID-19 outbreak⁵
