HOW TO ENHANCE CYBERSECURITY AS YOUR OFFICE REOPENS

Whether you’re preparing to begin calling employees back on-site next week or next year, here are some tips to ensure a secure return to work.

1. ENSURE REMOTE WORKERS’ DEVICES ARE BEING UPDATED

60% of breaches result from failure to apply a security patch¹

2. REFRESH CYBERSECURITY TRAINING

43% of employees lack cybersecurity training²

3. VALIDATE DEVICES AS EMPLOYEES RETURN ON-PREM

72% of organizations are evaluating a Zero Trust model to ensure user, device, and infrastructure verification³

4. REEVALUATE CYBERSECURITY POLICIES

98% of CISOs/CIOs are planning shifts in cyber strategy in response to the COVID-19 pandemic⁴

5. PLAN FOR A LONG-TERM REMOTE WORK STRATEGY

71% of security professionals have reported increased security threats or attacks since the COVID-19 outbreak⁵
